Jeman Mama

Senior Software Engineer | Hands-on **Dev Lead** | Architecture-focused

jemanmama@gmail.com jemanmama.filli.me +63 961 418 4490

Professional Summary

Senior Software Engineer and hands-on **Dev Lead** experienced in **Java**/**Spring Boot**, fintech, cloud-native systems, secure integrations, and production delivery. Leads engineers while maintaining a full coding workload, translating architect-defined solutions into implementation, and coordinating across business, QA, platform, and management teams. Introduced a human-reviewed **AI-assisted SDLC** that produced an observed approximately 3x improvement in feature implementation speed across a six-developer team. Progressing toward software architecture with a pragmatic, cost-conscious approach.

Recent Fintech Experience

Orange & Bronze Software Labs, Inc. - Major Fintech Client, **Dev Lead**, Lending Operations Platform — Mar 2026 – present

Hands-on technical lead for a six-developer fintech team; joined as replacement lead and rapidly took ownership of development context, delivery, and production readiness.

- Lead six developers while carrying a developer-level coding workload; assign work, approve implementations, resolve technical escalations, and communicate delivery progress.
- Bridge the solution architect, developers, business stakeholders, QA, infrastructure teams, and management to turn solution direction and requirements into consistent implementation.
- Introduced a repository-aware, human-reviewed **AI-assisted SDLC** spanning refinement, planning, coding, testing, defect analysis, review, and deployment readiness, with an observed approximately 3x improvement in feature implementation speed.
- Implemented **Flowable**-based persistent state and retry handling for daily batch processing around a backend processing service using **gRPC**, including aggregate status, failure persistence, and manual retrigger behavior.
- Own development-side production readiness through deployment runbooks, database and infrastructure requests, dependency coordination, live deployment support, and application health monitoring.

Orange & Bronze Software Labs, Inc. - Major Fintech Client, **Dev Lead**, Digital Credit Application Platform — July 2024 – Oct 2025

Led full-stack delivery of a loan and credit-card marketplace from development through gradual rollout to eligible users of a major fintech platform.

- Worked with a dedicated solution architect to translate the solution into implementation within a large fintech environment and its formal security, infrastructure, and release controls.
- Supported a workload recalled at approximately 100 TPS, predominantly reads, and around 2,000 loan applications per month, with integrations to three partner banks.
- Implemented secure daily partner-bank delivery by collecting application data and documents, generating ZIP packages, encrypting them with OpenPGP using PGPainless, and delivering them through synchronized SFTP infrastructure.
- Protected stored partner public keys with AES-128-GCM and supported controlled rollout through Firebase Remote Config and the client's standard **Kubernetes** canary deployment process.
- Built backend services with **Java** and **Spring Boot** and frontend modules with Vue 3 and Pinia for Android and iOS webviews.

Earlier Experience

Orange & Bronze Software Labs, Inc., **Dev Lead**, Financial Advisor Presentation Platform — Feb 2023 – Feb 2024
Led a four-developer team that owned application design and platform delivery without dedicated architect or DevOps roles.

- Helped design and implement backend-authoritative, real-time shared application state using **Spring Boot**, React, WebSockets, and STOMP; debounced client input to control update frequency.
- Installed Tanzu Application Platform and Tanzu PostgreSQL on **AWS** EKS, then deployed the application into the platform.
- Sized the Tanzu/EKS footprint around the minimum practical platform requirements to control **AWS** cost while maintaining application viability.
- Integrated **AWS** Cognito, Stripe, DocuSign, HubSpot, iTextPDF, and Chart.js into the consultation and presentation workflow.

Orange & Bronze Software Labs, Inc., Cloud-native R&D Engineer, O&B Way — Apr 2022 – Feb 2023
Evaluated emerging technologies, built proofs of concept, and presented findings internally for potential client use.

- Researched microservices, Docker and Docker Compose, **Kubernetes**, GitLab CI/CD, virtual **Kubernetes** clusters, Loft, and VMware Tanzu Application Platform.
- Applied this platform foundation later while taking infrastructure ownership on the Financial Advisor engagement.

Career Progression

Merit-based progression: Enterprise Engineer 2 (May 2025); Enterprise Engineer 1 (Aug 2024); Professional Engineer 2 (May 2024); Professional Engineer 1 (Dec 2023); Associate Engineer 2 (Jul 2023); Associate Engineer 1 (Nov 2022); Probationary Engineer (May 2022).

Technical Skills

Backend: Java 17/21, **Spring Boot** 3.x, Spring ecosystem, REST, **gRPC**, Hibernate/JPA, Maven, Gradle

Cloud and delivery: AWS, EKS, **Kubernetes**, Helm, ArgoCD, GitLab CI/CD, Docker, Tanzu Application Platform

Data and integration: PostgreSQL, MySQL, **AWS** Aurora, Redis, S3, Kafka/**AWS** MSK, SFTP, WebSockets, STOMP

Workflow and security: Flowable, OAuth2, Keycloak, **AWS** Cognito, AES-GCM, OpenPGP/PGPainless

Frontend: Vue 3, Pinia, React, JavaScript, Chart.js

AI-assisted engineering: Requirements analysis, repository-aware planning, implementation, test execution, defect triage, code review, and production-readiness analysis with human and QA controls

Education

BS **Mindanao State University - Iligan Institute of Technology**, Information Technology — 2022

- Magna Cum Laude; College Valedictorian; CGPA 1.24

Certifications and Training

Orange & Bronze Java certifications: Java 201 - Professional **Java** Best Practices (Feb 2024); **Java** 301 - Enterprise **Java** Best Practices (Dec 2023); **Java** 202 - Professional **Spring Boot** with JPA (Aug 2023); **Java** 101 - **Java** Fundamentals (Jun 2023)

Additional training: Domain Driven Design & Microservices for Architects; PostgreSQL High Performance Tuning Guide; Tanzu **Kubernetes** Grid - Install, Configure, Manage V1.5
